

CONDITION MONITORING EXCELLENCE

AVIATION SAMPLE KITS

Oil Sample Kit

This kit consists of a 60 ml bottle with tubing, to help you extract the oil, and a sample label. The UK prepaid version is supplied with a shipping envelope whereas the Jet-Care USA version is supplied with a cardboard tube.

Hydraulic Fluid or Fuel Analysis Kit

The kit includes a 250 ml plastic bottle suitable for hydraulic fluid or fuel, a sample form, instructions and address labels. This is packaged in a sturdy cardboard tube for easy and safe shipping.

Debris & Filter Analysis

To help you prepare debris samples (e.g. found on a chip detector) we supply **FREE** packs containing 10 Chip Check Cards. We also provide containers for you to send filters for analysis.

IMPORTANT: The cost of sample analysis when you provide a debris sample on our Chip Check Cards is less than if you send it by other means e.g. your own prepared paper or bag.

SOAP Kits

We stock a wide range of SOAP (Spectrometric Oil Analysis Program) kits for engines and APUs (Auxiliary Power Units). A standard kit includes a new filter and O-rings, with 8130-3 certificates, and containers to return the used oil and filter. All SOAP kits are supplied inclusive of the oil and filter analysis.

KIT DESCRIPTION	JET-CARE USA P/N	SPECTRO UK/AG P/N
60 ml Oil Sample Kit	KA100.BUR	KAXOIL60
Prepaid 60ml Oil Sample Kit (analysis included)	KA100	KAYOIL60
